Hey Vivek...

I really like what you're doing with this...it has that darker glass feel about it. I love some of those glyphs, and the clean simplicity of it works really well. If I was to be a little picky, I would say that it's lacking good contrast in some areas. I'm struggling to see some elements as well as others. I understand you have deliberate focus on some areas, but the less 'enabled' features are a little bit difficult to see.

Overall though mate, I REALLY like it.

Prismic Reflections® TEAM

Nice work!! Its clean & subtle! One friendly suggestion though - the thumbnails under "User" section need to shift on right hand side with some margin so it will look consistent to the "Companies" thumbnail.
